

# Enhanced OFAC AWS WAF Managed Rules: Automated OFAC Compliance At Your Fingertips

Navigating global sanctions is crucial for compliance and business integrity. Enhanced OFAC Compliance Managed Rules integrate seamlessly with ThreatSTOP's products, including IP Defense, DNS Defense, DNS Defense Cloud, and AWS Web Application Firewalls, offering comprehensive protection from prohibited communications with OFAC-sanctioned countries, entities, and subsidiaries. With real time updates powered by FiveBy's exclusive research and ThreatSTOP's threat intelligence, this solution ensures your business maintains compliance and avoids violations.

## Features

### Intelligence Collection

Backed by ThreatSTOP's 900+ curated feeds and FiveBy's exclusive sanctions data, offering unparalleled coverage.

### Policy Customization

Tailor compliance rules to your organization's unique requirements.

### Device Integration

Integrates seamlessly with existing network devices, offering proactive compliance across your infrastructure.

### Advanced Reporting

Real-time insights and automated alerts provide visibility into blocked threats and compliance efforts.

### Key Benefits:

- **Fast, Simple Deployment:** Deploy compliance quickly with ThreatSTOP products or directly integrate with AWS Web Application Firewalls, providing easy-to-apply managed rules.
- **Extensive Compliance:** Comprehensive data curated in-house and in conjunction with FiveBy ensures broad and in-depth sanctions compliance.
- **Continuous Updates:** The ThreatSTOP Security, Intelligence and Research team and FiveBy experts monitor global sanctions constantly, offering automatic updates to ensure consistent protection.

## Stay Compliant, Protect Your Business

Enhanced OFAC Compliance Managed Rules ensure robust and scalable sanctions protection across all your devices, preventing prohibited communications and ensuring peace of mind. For seamless compliance, discover our Enhanced OFAC Compliance Managed Rules and keep your business safe.
